### Thermotech Completes Heat Wheel Renovation at St. Luke's Cornwall Hospital In Newburgh, NY.

John Roberts and Mike Pascale in front of AHU unit with Thermowheel TR-474 control panel.

Thermotech has completed retrofitting the last of the 3 Wing 4770 Heat Recovery Wheels at the Newburgh, New York campus of [St. Luke's Cornwall Hospital](#). The project commenced in the fall of 2004 and an immediate energy savings was realized by the hospital, according to [SLCH's](#) Director of Engineering, Michael Pascale and Engineering Supervisor, John Roberts. In addition, there was an overall improvement in the indoor air quality provided by the [TR-474 Thermowheels](#).

Many thanks to Michael Pascale, John Roberts, and the staff at [St. Luke's Cornwall Hospital](#) for their help in making this a successful project.

## Selection Software Release

[Thermotech's](#) new energy recovery wheel selection software is now available. Accurate and easy to use software for designing both single and dual wheel applications. Output features both performance and ordering keys for all Thermotech wheels. Contact [Barb Morgan](#) or [Jim Rhodes](#) for more information and product download.
